

Dear Congressman, just a Friendly Reminder that:

## **You swore an oath to defend the Constitution.**

Dictator: a ruler who is unconstrained by law

Bush is asking Congress to officially announce that he is indeed above the law- in effect crowning him America's first dictator.

Spying on Americans without a warrant is expressly forbidden in the Constitution. Bush admitted to authorizing this unconstitutional act more than 30 times. This means Bush broke the law. There is no grey area here, Bush broke the law- period.

What's worse is that Bush knows he was breaking the law, and then continued to lie about it at his press conference Dec 19th when he claimed that he had this authority under the Constitution- an outright lie to America on National television.

Proof: During a series of campaign speeches in 2004, Bush talked about wiretaps and claimed that a court order was always used in cases of domestic spying. We know now that this was untrue- Bush deliberately lied to his supporters on the campaign trail.

To all Bush Supporters: he looked in your face and lied to you.

But more importantly, this video proof of Bush on the campaign trail proves that **he knew it was against the law** to spy on Americans without a warrant... and **he did it anyway** as he lied to his followers.

Bush also lied when he said they were only monitoring international phone calls. A leak to a NY Times reporter exposed that in fact, the NSA had "tapped into the main arteries" of America's telecommunications system. Supposedly looking for patterns of terrorist activity, they were monitoring all phone and email traffic in America.

Maybe they didn't authorize rogue agents to use this tool to identify dissenters... but they opened the door for such abuse to take place. That is a High Crime worthy of Impeachment.

At this point, there is no need for an investigation. ZERO. All the evidence is in public. The President admitted to an impeachable offense on national television.

This is your moment of truth: Are you loyal to Bush or to America?

And if you do not hold Bush accountable then you will have broken your sworn oath, and someday you too will be held accountable.
